Re: Certification for Star Pipe Products Imported fittings

We certify country of origin compliance per below:

Imported Fittings: These fittings are assembled, packaged and Quality Control checked by SPP in our overseas facilities. Coatings and linings may be applied domestically. Additional Quality Control checks are conducted domestically when the product is received.

Star Pipe Products certifies that all fitting products are made of ductile iron per ASTM A536, Grade 65-45-12 and conform to the following standards:

- *AWWA C104(ANSI A21.4) for cement-mortar lining of ductile iron pipe and fittings for water*
- *AWWA C110(ANSI A21.10) for cast iron/ductile iron mechanical joint and flanged fittings*
- *AWWA C111(ANSI A21.11) for ductile iron mechanical joint glands and gaskets*
- *AWWA C153(ANSI A21.53) for compact mechanical joint and push-on ductile iron fittings*

Star Pipe Products offers a variety of coatings and linings for the fittings it supplies. When a cement-lined and asphaltic-coated fitting is ordered, the asphaltic coating is applied inside and out in accordance with AWWA C104 (ANSI A21.4). The cement lining is applied in accordance with AWWA C104 (ANSI 21.4). These standards are met with both domestic and imported fittings, and they are met regardless of outlet style: standard mechanical joint, flange, or push-on.
