GENERAL

Star Pipe Products is a registered ISO 9001:2008 company. ISO Certification allows Star Pipe Products to ensure that our products and services meet or exceed industry wide standards throughout the entire order process, from quotation to delivery and beyond. Star Pipe Products certifies all cast iron and ductile iron fittings, flanges, municipal castings, joint restraints, and accessories are designed and produced according to all applicable AWWA, ASTM and ANSI standards and latest revisions.

STANDARDS AND TESTING

*AWWA C104 (ANSI A21.4) for cement-mortar lining of ductile iron pipe and fittings for water
AWWA C110 (ANSI A21.10) for cast iron/ductile iron mechanical joint and flanged fittings
AWWA C111 (ANSI A21.11) for ductile iron mechanical joint glands, T-head bolts and gaskets
AWWA C115 (ANSI A21.15) for cast iron and ductile iron flanges, sizes 3" – 54"
AWWA C153 (ANSI A21.53) for compact mechanical joint and push-on ductile iron fittings
ASTM-A 48 Class 30 B valve boxes, manhole rings & covers, frames, grates and solid covers*

LEED CONTENT

Star Pipe Products is proud to support sustainable building programs and projects. Our products consist of virgin and recycled raw materials used for molding cast and ductile iron castings in the utility market. They are cast from 10-50% on average post-consumer scrap iron and steel and 10-45% on average post-industrial scrap.

The recycled material is made up of sorted scrap steel and castings that have been recycled and certified for this purpose. The scrap is also screened for radioactivity prior to production. All products are manufactured at ISO certified foundries overseas.
